

## Compilation Process

- What happens when we compile?
  - What is object code?
- Invoked via a front-end driver:
  - Run the preprocessor.
  - Run the compiler.
  - Run the assembler.
  - Run the linker.
  - *[Show]*
- What happens when you run a compiled program?
  - OS loads the file into memory.
  - Sets up various memory regions.
  - May do some runtime linking/relocation.
  - Jump to main.
  - *[Show]*
